

2022 miBike AUSTRALIAN SUPERBIKE CHAMPIONSHIP

ROUND 7 – THE BEND MOTORSPORTS PARK - SA

TIMING BULLETIN

Intermediate/sector timing

3 intermediate points will be used again to create 4 timing sectors, plus a speed trap just after pit exit (as per last year). The split times and speed will be shown on the Race Display screen, the Compulive internet-based timing application, and in printed reports. Refer to the map below for approximate locations:

Timing transponder collection and deposits

Transponders will be available for collection from the Race Secretary's office on THURSDAY afternoon from 3pm and FRIDAY morning from 7:15am.

Transponder brackets and additional transponders

Transponder mounting brackets are available for sale for **\$12 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

Where you have not organized and paid for a second transponder for your spare bike as part of your entry, and want to hire one, these are available for **\$25 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

NO transponder deposit required

There will be NO REQUIREMENT to sign for the transponder collected, nor is any credit card deposit required, however the competitor acknowledges in participating in the event that failure to return the transponder with 30 minutes of the conclusion of the event may result in additional costs being incurred by the competitor. Further, if the transponder is damaged or lost, the competitor will be liable for repair or replacement costs.

Timing transponder mounting

It is your responsibility to ensure that timing transponders are properly mounted for all sessions (including practices and warm-ups). Instructions for the mounting of the transponder, can be provided when collecting the transponder where. Competitors found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder.

Television live timing

Televisions in garages will automatically show Computime's Race Display live timing, CompuTrack track positioning display, and/or circuit vision (Sunday only).

Computime website for live timing and results

Computime's website will be available for competitors with internet enabled laptop computers, tablets, and smartphones. The intranet site features:

- All results from the meeting (only minutes after each session is completed) in HTML format (for viewing on your web browser) and PDF (Acrobat) format for you to save and print later.
- A live timing display application (for the session currently in progress).
- Additional reports available for download that are not normally photocopied for competitors (intermediate lap times, lap sheets, lap charts, fastest lap sequence and points updated after each race).

Access at the venue

To access Computime's website from the venue, connect to **The Bend Guest Wifi** network and enter **www.localtiming.com** as the web browser address.

Access from elsewhere

Computime will also be providing live timing via the internet for anyone not in an area to access The Bend Guest Wifi network. Follow the links from **www.computime.com.au**.

Jump start cameras

To ensure consistency and accuracy in the assessment of potential jumped starts, Computime's jump start camera system will be set-up this weekend as usual. This system includes simultaneously recording cameras on each grid row and the start light. Any movement at the time the red light is extinguished will result in the implementation of a penalty.
