

## **2025 miBike AUSTRALIAN SUPERBIKE CHAMPIONSHIP**

### **ROUND 4 – MORGAN PARK RACEWAY**

#### **TIMING BULLETIN**

##### **Intermediate/sector timing**

Two intermediate timing points will be used to create three timing sectors, plus a speed trap at the finish line. The split times and speed will be shown on the Race Display screen, the Compulive internet-based timing application, and in printed reports. Refer to the map below for approximate locations:

##### **Timing transponder collection and deposits**

Transponders will be available for collection from the Race Secretary's office on FRIDAY morning from 7:15am.

##### **Transponder brackets and additional transponders**

Transponder mounting brackets are available for sale for **\$12 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

Where you have not organized and paid for a second transponder for your spare bike as part of your entry, and want to hire one, these are available for **\$25 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

##### **Timing transponder responsibility and return**

The competitor acknowledges in participating in the event that failure to return the transponder within 30 minutes of the conclusion of the event may result in additional costs being incurred by the

competitor. Further, if the transponder is damaged or lost, the competitor will be liable for repair or replacement costs.

### **Timing transponder mounting**

It is your responsibility to ensure that timing transponders are properly mounted for all sessions (including practices and warm-ups). Instructions for the mounting of the transponder, can be provided when collecting the transponder where. Competitors found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder.

### **Television live timing**

This venue does not have a hard wired or wireless TV distribution system. A television (showing live timing on Friday and Saturday, and the television broadcast on the Sunday) will be placed just outside the finish line tower.

### **Computime website for live timing and results**

Computime's website will be available for competitors with internet enabled laptop computers, tablets, and smartphones. The intranet site features:

- All results from the meeting (only minutes after each session is completed).
- LIVE TIMING (for the session currently in progress).
- Pit board display showing extended information for a selected rider.

Follow the links from [www.computime.com.au](http://www.computime.com.au).

### **Local wireless intranet site**

Computime's local intranet site will also provide the above web-based live timing and results without the need for internet access. The signal will only be available in pit lane and possibly into the pit garages. To access the local intranet site, connect to the "COMPUTIME" wireless network and use [localtiming.com](http://localtiming.com) as the web address.

### **Jump start cameras**

To ensure consistency and accuracy in the assessment of potential jumped starts, Computime's jump start camera system will be set-up this weekend as usual. This system includes simultaneously recording cameras on each grid row and the start light. Any movement at the time the red light is extinguished will result in the implementation of a penalty.
